finite element modules for enhancing undergraduate ... - problem statement: a fuel cell bipolar plate has channels etched in it to allow for the flow of reactant gases. the flow path is rather complicated to allow for equal gas distribution so that there is a uniform fuel concentration at the catalyst. this design will result in better efficiency for the fuel cell.

finite element modules for enhancing undergraduate ... - note: this example problem has been used in an elective course "fuel cell fundamentals" which is taken by chemical, mechanical, electrical, and biomedical engineering students as well as students in materials science. the students range in experience from sophomore to seniors level. thus this problem is meant to illustrate the **doi: 10.1595/147106709x474361**
